## Rich Ore at the Brunswick.

The Virginia and Truckee Railroad yesterday hauled from Virginia to the Brunswick mill ten car loads of ore. There would be nothing strange in this announcement were the shipment of the ore made in the usual way. But it seems that the ore was so rich that a special watchman accompanied its transportation. Our readers will remember that some two or three months ago a man by the name of Rowe was enjoined on the Comstock by the Ophir company from continuing work on a rich pocket he had discovered in the rear of his premises, it being on Ophir ground. We believe the find was situated in the woodshed of Rowe. He worked it for quite awhile, having it hauled away nights to be milled. The story goes that the teamster demanded an increase in the share of the profits, and failing to get it, peached on Rowe. Anyway, the matter coming to the knowledge of the Ophir folks, they got out an injunction and Rowe's occupation was gone. The clean-up at the Brunswick will undoubtedly be large.

## Library Party.

The next party under the auspices of the Ladies Library will be given in the hall above Harris Bro.'s store, next Friday evening. In future these dances will be given twice a month only. The price of admission will be one dollar for gentlemen, and ladies free. None but the best people attend the Library parties, and it is to be hoped that they will always be well patronized.

## Arrival of Zech.

## At the Opera House To-night.

Remember that to-night Dan Morris Sullivan's Mirror of Ireland and Irish Comedy Company appear at the Opera House. The play will be "A Trip Through the Emerald Isle," with Mr. and Mrs. Dan Sullivan in the principal characters. Connected with the entertainment are one hundred beautiful paintings, comprising a grand panorama of Ireland. Speaking of this troupe the Leadville Herald says:

We are pleased to note the opening of the Tabor, especially by as good a company as the Sullivans. Space forbids us giving an extended notice of their performance, but to all we will say that it is good, and justly merited the crowded house that greeted them. The panorama is the best that we have seen, and must have been executed by a master hand, so natural and life-like are they, while the sketches, songs and dances, as given by "Dan and Josie," keep the house in roars of laughter. Miss Josie possesses a voice of wonderful power and richness, and her songs never failed to elicit loud applause. Their sketch, "The Fortune Teller," kept the house in roars of laughter, and Dan Morris' "Officer Pat" was one of the most laughable things that we have seen. On the whole, it was a splendid performance, and whoever neglects to witness it will miss a rare treat.

## McMechan Held for the Killing of Seville.

The argument of the attorneys of the Directors of the Nevada and Oregon Railroad Company and others, accused of the killing of S. C. Seville, were concluded at Reno Monday night. Justice Young held James McMechan to appear before the Grand Jury; discharged Moore, Wheeler and Coffin, and ordered Fowler and Cogan to appear before him yesterday. The Reno Journal says: "It is probable that the Judge will order Fowler and Cogan released. He thinks they should be held to answer for felony, but can find no law to exactly cover his views of the matter."

## Water All Around New York and Yet Scarce.

The Croton water shed during the present drouth is not supplying the metropolis with all the water it needs, and the usual reserve. There is some anxiety felt about the immediate future, and copious rains will scarcely supply the near prospective needs. It seems as though New York will ultimately have to insert its pipes into the clear waters of Lake George, and look to that magnificent natural reservoir for its supply. The daily supply of water is now 95,000,000 gallons. That seems enough for a million and a quarter of people surely. The hotels use about 1,125,000 gallons a day, and the railroads use about 1,133,000 gallons. The breweries, laundries, hospitals and factories use immense quantities, but by far the greatest amount is used by the private residences. It is a curious fact that all last year the Fire Department used but 33,102,000 gallons of water in putting out fires, or less than one-third of one day's supply. Yet the scientists are discussing the propriety of establishing pumping stations along the river front, to fill a reservoir with salt water. It is shown by figures given that the saving would be trifling. Then the salt water would corrode pipes and greatly damage goods. The money employed to distill the salt water, it is believed, would be a sheer waste. The remedy for the situation is the construction of another aqueduct and more storage reservoirs. The present aqueduct was finished in 1842. It was calculated to supply 60,000,000 gallons daily. The demand was calculated at thirty gallons daily for each inhabitant, and it was thought that an apparatus and supply had been provided that would last out the century. But in a few years after the aqueduct had been opened the consumption had increased to sixty gallons a head per day, and at present an allowance of 150 gallons a head would be consumed if the Department could furnish it. For seven or eight years the Department has had to take the risk of forcing an aqueduct built to carry 60,000,000 a day to carry 95,000,000.—N. Y. Corr. St. Louis Republican.

## Of Such is the Kingdom of Heaven.

There is one thing, all new-comers in the Church of Jesus Christ of Latter-day Saints do not arrive in America with any idea that they are to be citizens of the country. There is an example in the Tenth ward, where a Scandinavian girl is at work for a Gentile family, where she has a good home and good wages. She gives the best satisfaction and appears to be a nice girl, but she is so saturated with the Latter-day fraud that she gave her mistress notice that she was going home and marry a man in polygamy—to be a celestial wife. Nothing in the way of argument seems to have any effect to deter her from taking the step, but she sails into the slough of beastly polygamy for the glory of God, as she believes, and at the same time becomes a felon in the eyes of the law. Uncle Sam, in her estimation, is a secondary consideration to becoming a celestial wife in the world to come and a concubine in this. —Salt Lake Tribune.

## Wood for Sale.

I will sell wood, as good, and even better, than any in Carson, two-thirds red fir limbs, and one-third split yellow-pine (mixed) at \$7 per cord. A reduction of fifty cents will be allowed to parties taking five cords or more at one time. I have also a quantity of nut-pine and cedar, which I will sell at proportionately low figures. Terms strictly cash on delivery. D. CIRCE.

Croup—Ammen's Cough Syrup. Ammen's Cough Syrup is not a patent medicine. No patent has ever been asked for or been obtained upon it. To protect the public from counterfeits and imitations the manufacturer had the label registered at Washington. The Syrup is from pure and costly drugs, and cannot be sold as cheap to the dealer as the common patent medicines that are simply made to sell, which explains why dishonest druggists or dealers try to sell you something else when asked for Ammen's Cough Syrup. It is upon the market upon its own merits. You can buy a sample bottle for 15 cts., upon which, at the wholesale price the manufacturer makes nothing. Ask to see a large bottle, and read the label.

Dr. G. Haas, of San Francisco, Surgeon Dentist (graduate of New York College of Dentistry) will be in Carson on or about the 27th instant. Parties contemplating having dentistry done will do well to wait until said gentleman arrives. The Doctor visits patients at their residence, his workmanship is unexcelled and charges reasonable. He will be at the Ormsby House, where all orders can be left. oc-25
